HENNANI AYOUB BRAHIM

Junior DevOps Engineer | Software Engineer | Full-Stack Developer

ayoubbrahim.hennanii@gmail.com | 0722307915 | ayoub-hen | Ay-hen | Portfolio

Profile

Junior software engineer with experience in Java/Spring Boot application development, REST API security and PostgreSQL and MongoDB database management. Interested in automation, containerization and CI/CD practices, with a technical foundation in Git, Docker, Jenkins and Maven. Eager to contribute to application reliability, automation and deployment.

Technical Skills

DevOps & Tools: Git/GitHub, Git Flow, Jenkins, Docker, Maven, CI/CD
Systems & Scripting: Linux, Python
Backend & APIs: Spring Boot, Spring Security, Spring Data JPA, JWT, NodeJS, Django
Databases: PostgreSQL, MongoDB, MySQL, SQL
Languages: Java, Python, TypeScript, PHP, C & R
Frontend: Angular, ReactJS, HTML, CSS, JavaScript

Professional Experience & Projects

Full-Stack Developer | Nexus E-Commerce Platform *Freelance*

Description: Development of an e-commerce platform for managing products, inventory, orders and customers.

- Developed e-commerce modules (products, inventory, orders, customers) and REST APIs with Spring Boot.
- Secured the platform with JWT and role management using Spring Security.
- Designed an admin dashboard with management features and analytics; source code versioned on GitHub.

Technologies: Angular 22, Spring Boot, Spring Security, JWT, REST API, Git/GitHub *Github*

Full-Stack Developer | Final-Year Internship (PFE) Business IT Solutions, Casablanca *Feb. – Aug. 2025*

Description: Design of a web/mobile banking solution for managing accounts and financial transactions.

- Developed banking transactions and 15+ documented REST APIs, consumed by the web (Angular) and mobile (Kotlin/Android) clients.
- Implemented stateless JWT authentication and secured access with Spring Security.
- Modeled and managed the PostgreSQL database with JPA.

Technologies: Java, Spring Boot, Spring Security, JPA, PostgreSQL, Angular, Kotlin, Android & JWT *Github*

Full-Stack Developer | Internship (PFA) 2MOROCCO, Rabat *Apr. – Jun. 2024*

Description: Development of a photographer booking platform with user, availability and reservation management.

- Developed the booking system and availability management (MongoDB persistence).
- Set up a multi-role architecture for clients and photographers.
- Automated validations and secured the application with JWT/Spring Security.

Technologies: Java, Spring Boot, Spring Security, Angular, MongoDB, JWT *Github*

Full-Stack Developer | Expium *Personal Project*

Description: Development of a social network for content sharing and real-time interaction.

- Implemented real-time messaging and notifications with WebSocket.
- Secured the APIs and handled authentication with JWT.

Technologies: Spring Boot, React.js, MongoDB, WebSocket, JWT *Github*

Education

Faculté des Sciences et Techniques de Mohammedia (FSTM) *2022 – 2025*
Engineering Degree: Mathematical and Computer Engineering *Morocco, Mohammedia*

Faculté Polydisciplinaire de Ouarzazate (FPO) *2019 – 2022*
Bachelor's Degree (Licence): Mathematical Sciences and Computer Science *Morocco, Ouarzazate*

Faculté Polydisciplinaire de Ouarzazate (FPO) *2019 – 2021*
DEUG (2-year university diploma): Mathematical Sciences and Computer Science *Morocco, Ouarzazate*
